

ABOUT ME

Emerging software developer utilizing years of sales experience, hard work, and teamwork to achieve proven results. Within the field of Software Development I hope to one day work with, and design, the AI and Machine Learning technologies that will drive mankind into the future.

PROFESSIONAL SKILLS

- Proficient in C#, Java, Javascript, React.Js and Python
- ASP.Net Framework
- Efficient Learning
- Object-Oriented Programming
 - Problem Solving
- Project Management
 - Team Management
- Database Management and Design
 - Communication

AARON MADISON

Software Developer

Projects

RouteWay:

RouteWay is an ASP.Net app I designed to improve the daily work life of Vendor Sales Representatives. It uses an ASP.Net Web API I created to store Employee and Route data in a database following the Repository Design Pattern.

Custom List:

In this project I designed a Custom List data structure to recreate the List class of C# to better understand it's functionality and data structures as a whole

Battleship Game:

This console game recreates the battleship board game, I enjoyed completing it because I was able to further dive into AI and Machine Learning to improve the computer player's logic.

Work Experience

Pre-Sales Representative

Nestle (Jan 2017-Nov 2019)

- Maximized sales of products and provided excellent customer service, increasing route sales 17% over the previous year.
- Responsible for all accounts assigned within a designated territory in partnership with Delivery Drivers and Merchandisers
- Identified and acted on selling opportunities, made secondary placements, sold in extra displays, and made effective sales presentations through use of sales data.
- Worked in a large state-wide team

EDUCATION

DevCodeCamp (Jan 2020 - March 2020)

Certificate in Full-Stack Development

DevCodeCamp is a 12-week fully-immersive coding bootcamp that teaches students full stack software development, how to effectively problem solve, communicate with developers and project managers, and be resourceful on the job.
